# Does SIZE Matter?

and discussed how to judge the size of a penis. Is it really important most might ask. But in today's world where moving in and out of a relationship is not a big deal and a topic of open discussion, a lot goes just for the size. Undoubtedly it is because of the size that there has been many splits amongst couples. Like Sangeetha, Ramya and Lisa there can be thousands of others who might feel the same. However funny it may sound, the length of a penis is a matter of wonder to many. Gaging a size is just next to impossible. To be precise even a man of triceps and 6 packs can break your fantasy.

Dr. Deepak Jumani, Diplomate American Board Certified Clinical Sexologist says, "Size does not matter. It is not the length of the penis, it is the strength and its function. When it comes to sex it is either a matter of procreation or recreation. The vaginal passage where you insert is 6 inches in length. It is elastic. The outer 1/3 of the vaginal passage contains all the nerve ending and receptive powers which are responsible for the pleasure in a woman including the G spot. So beyond this 1/3 which would

be approximately 2 inches and a little more the rest 2/3 area is insensitive. This means the optimal length of the penis in an erect state has to be little more than 2 inches".

A decent size would also allow you to do good and comfortable oral sex rather than trying to coercing a huge one inside your mouth. But then men are obsessed with the size. Men having a penis size of 5 inches feel that their penis size is small. This is when some real time advices come into action. The point to be noted is women don't focus on the size until the play is not right. Women focus more on what needs to be done with it. Frankly speaking women spend more time talking about whether their man washes himself and smells good, rather than how it looks like.

A nose is a nose. What difference will it make be it a horse or a pony? It is the act of love and affection between you and your partner. The whole purpose of a sexual intercourse is for both of you to enjoy a climax. So long as the functions are taken care, you can plan for a holiday every year!
